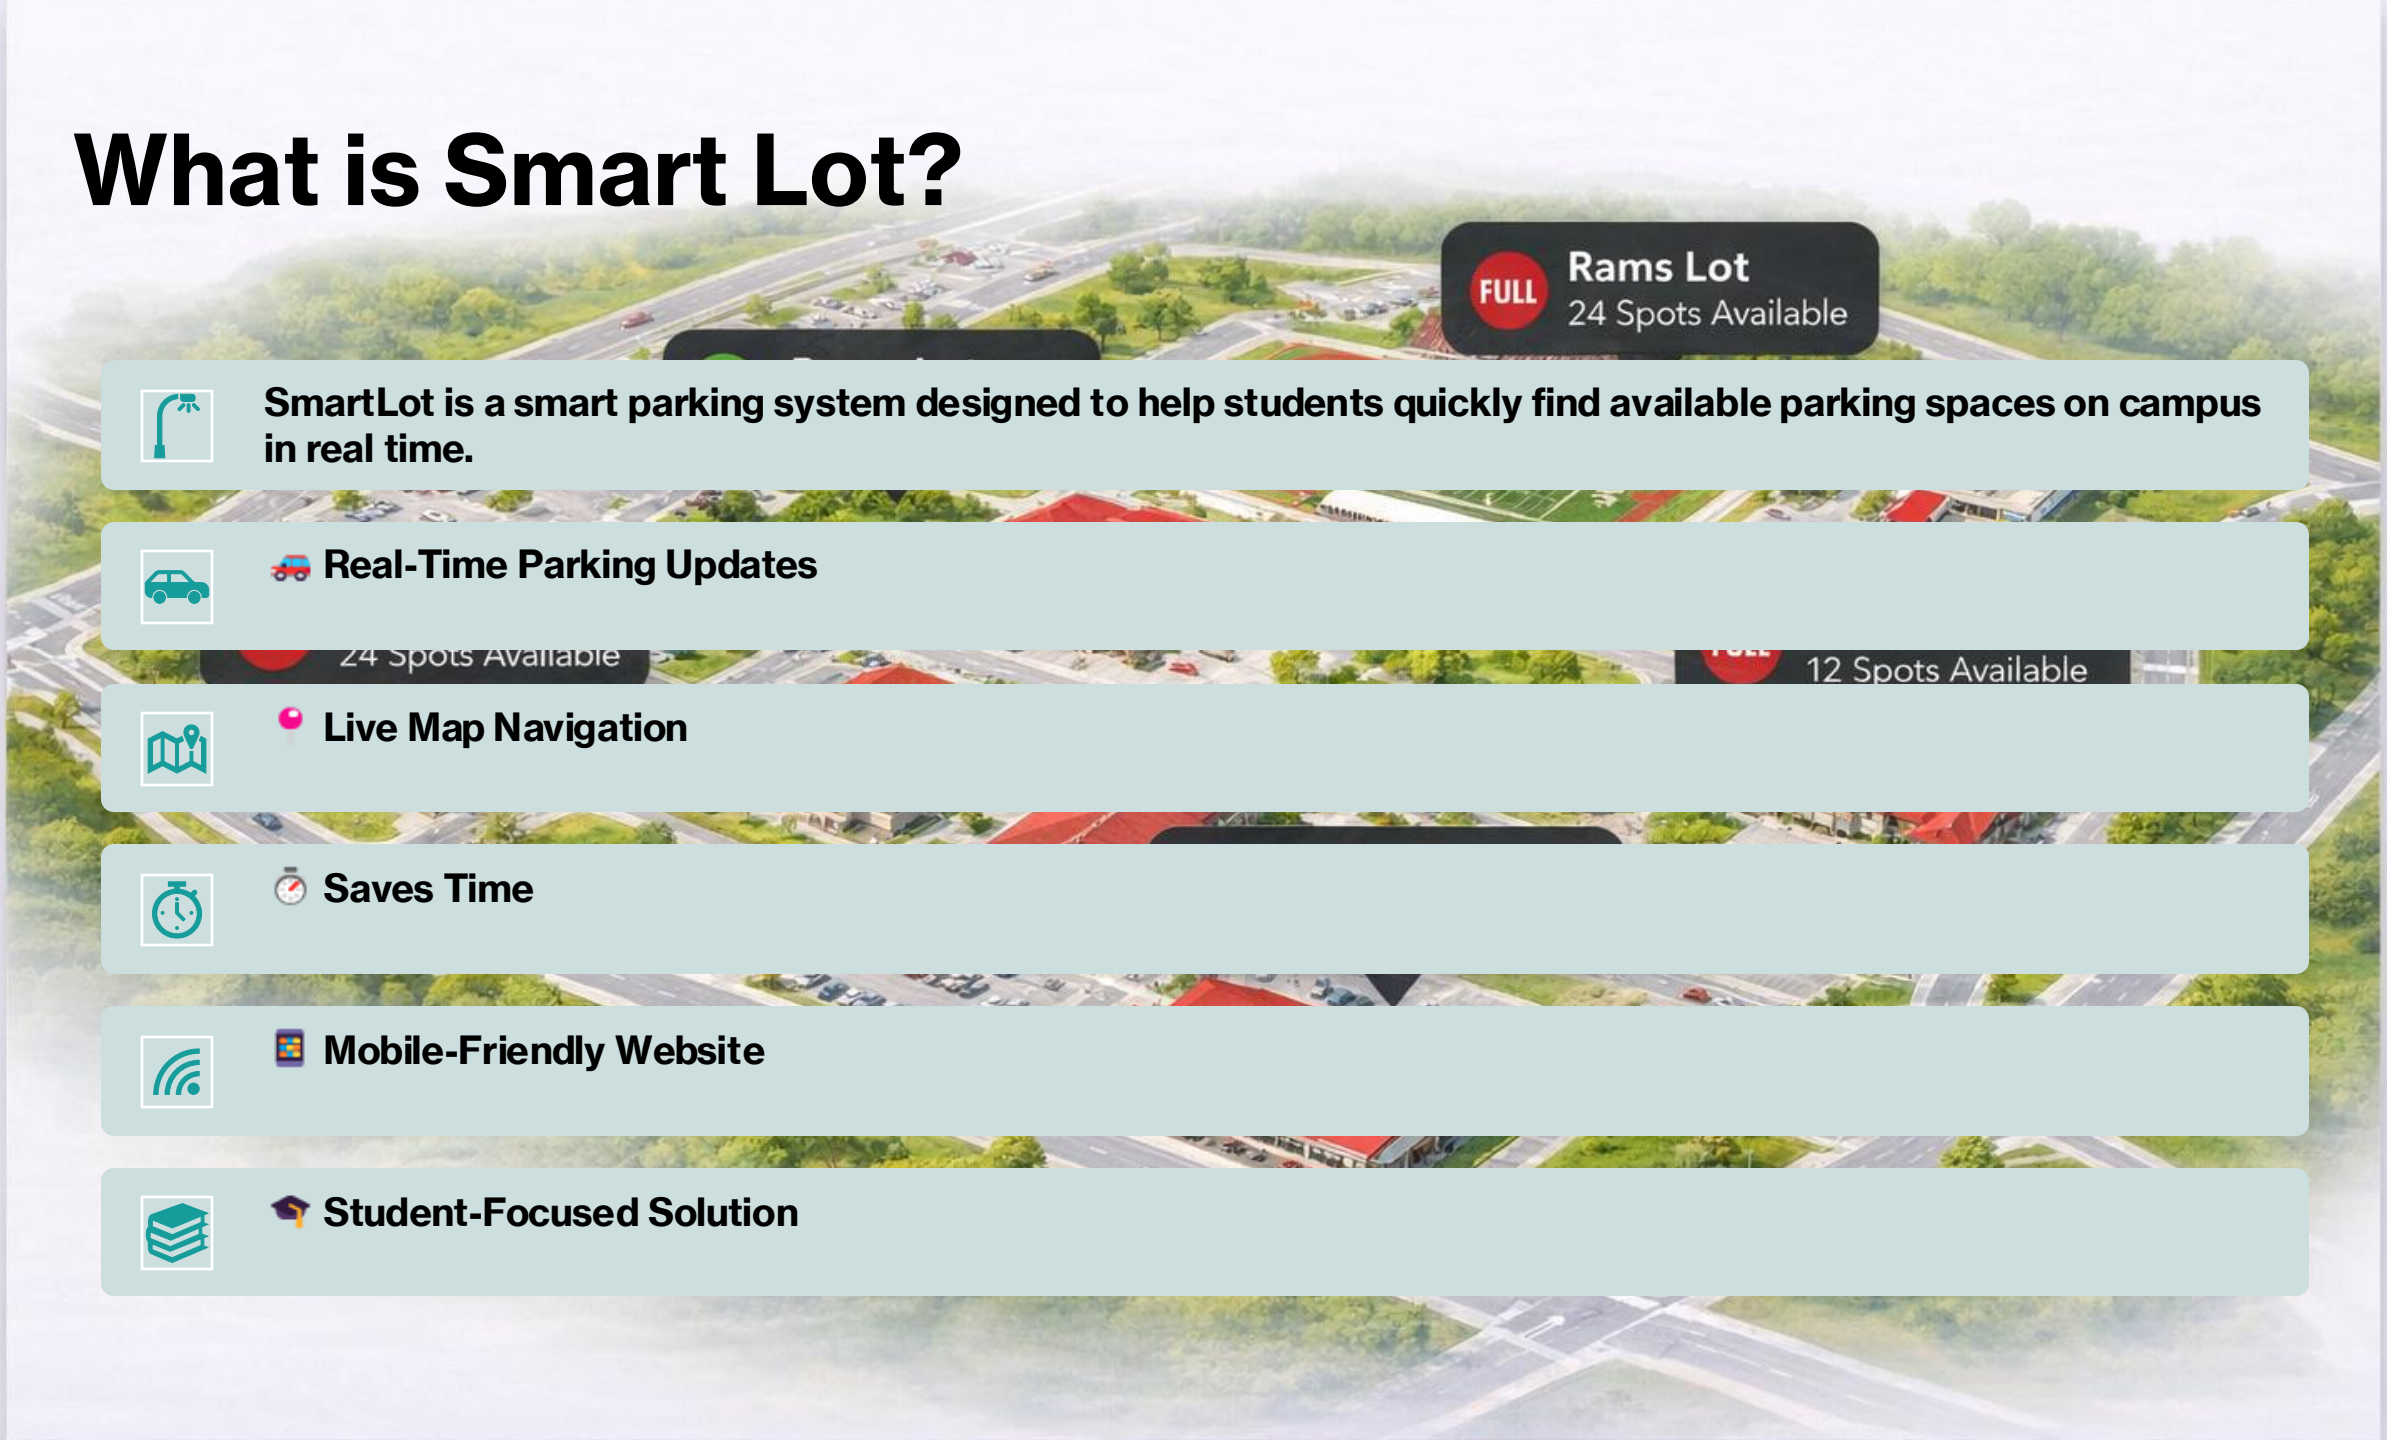
What is Smart Lot?



SmartLot is a smart parking system designed to help students quickly find available parking spaces on campus in real time.

🚙 **Real-Time Parking Updates**

📍 **Live Map Navigation**

⏱️ **Saves Time**

📱 **Mobile-Friendly Website**

🎓 **Student-Focused Solution**

Why do we need Smart Lot?

Parking on campus is frustrating → Students waste time driving lot to lot → Limited visibility of available spaces → lateness to class → Traffic congestion increases during peak hours & ADA availability → 👉 “you shouldn’t have to park far when there is something close”

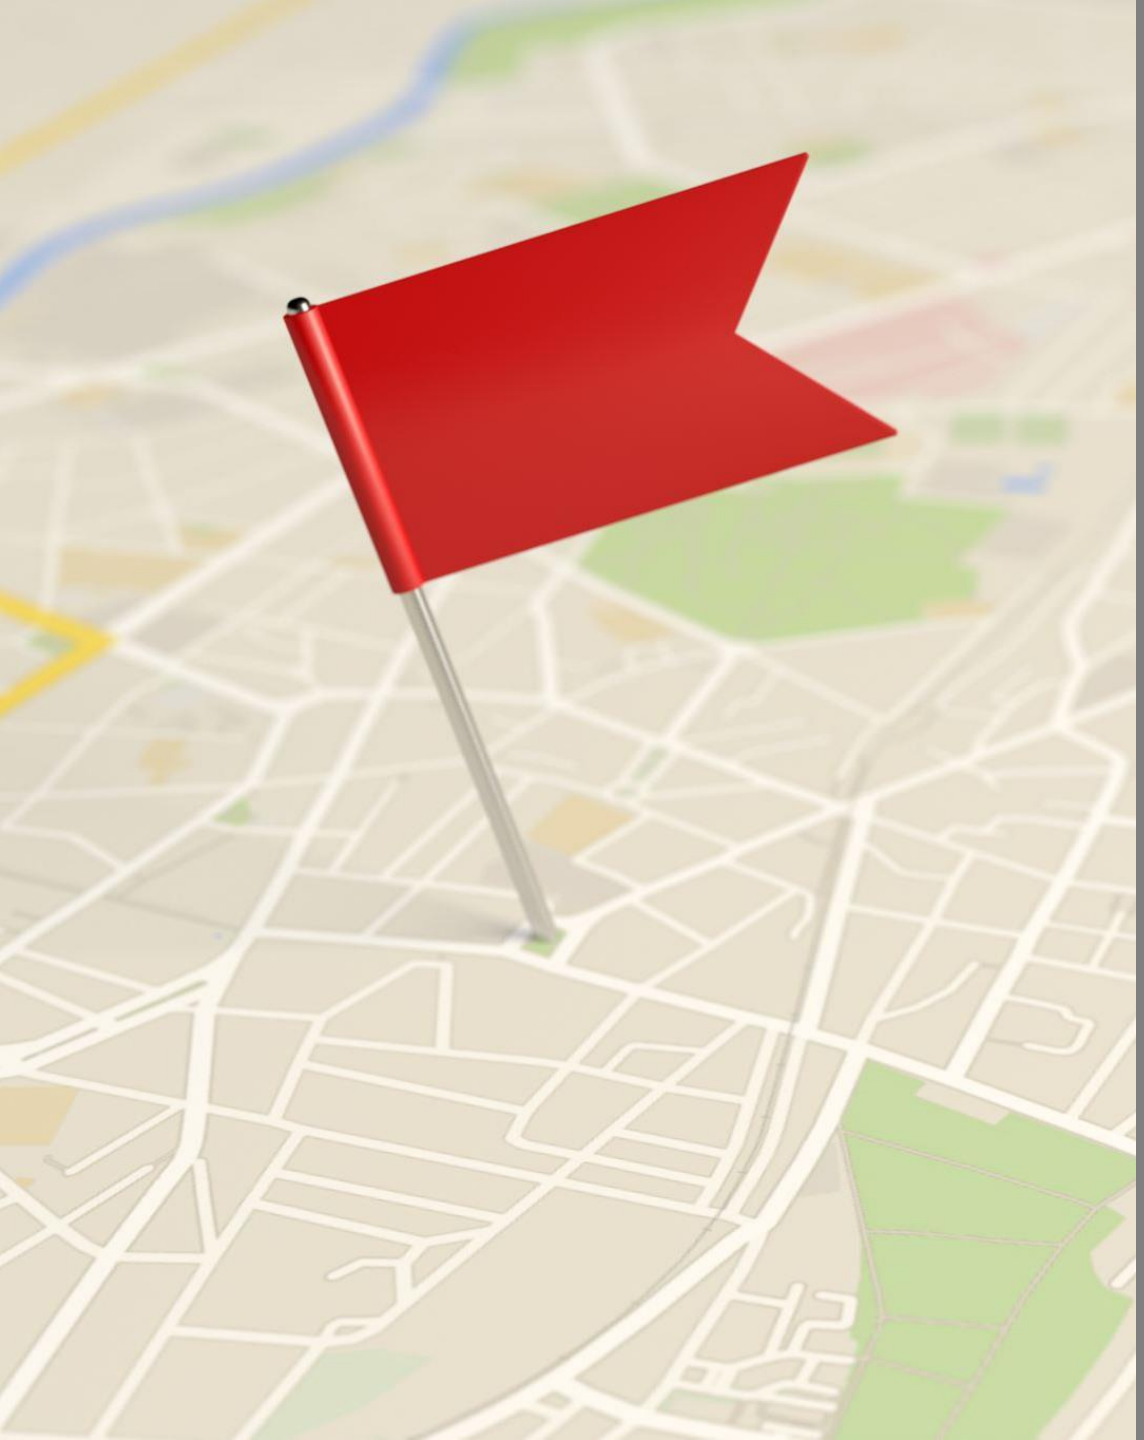
How does Smart Lot work?

Student check in and out parking spots detect open parking spaces accompanied by Winston Salem State University Parking and Transportation

Data is updated in real-time

System sends information to the website *future App*

Students view availability and navigate to a spot with a 10 minute window to check in

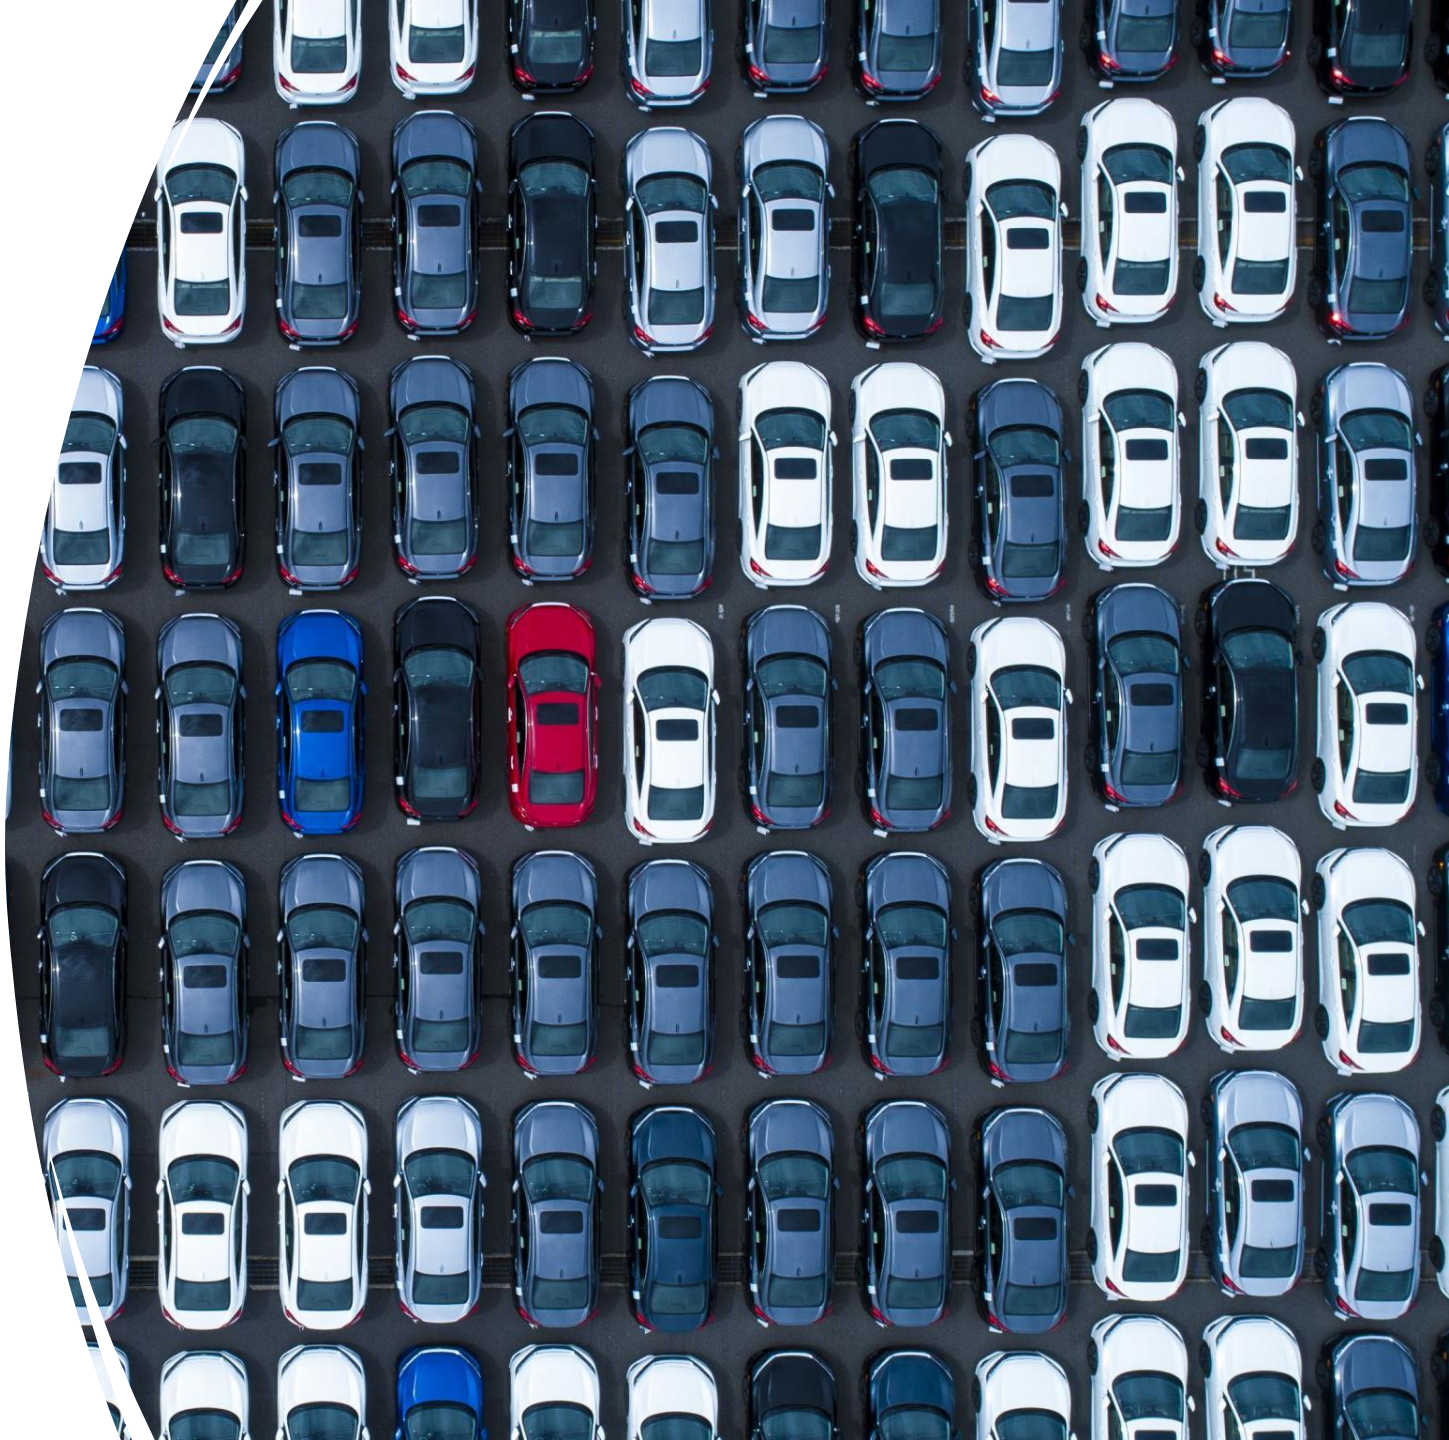


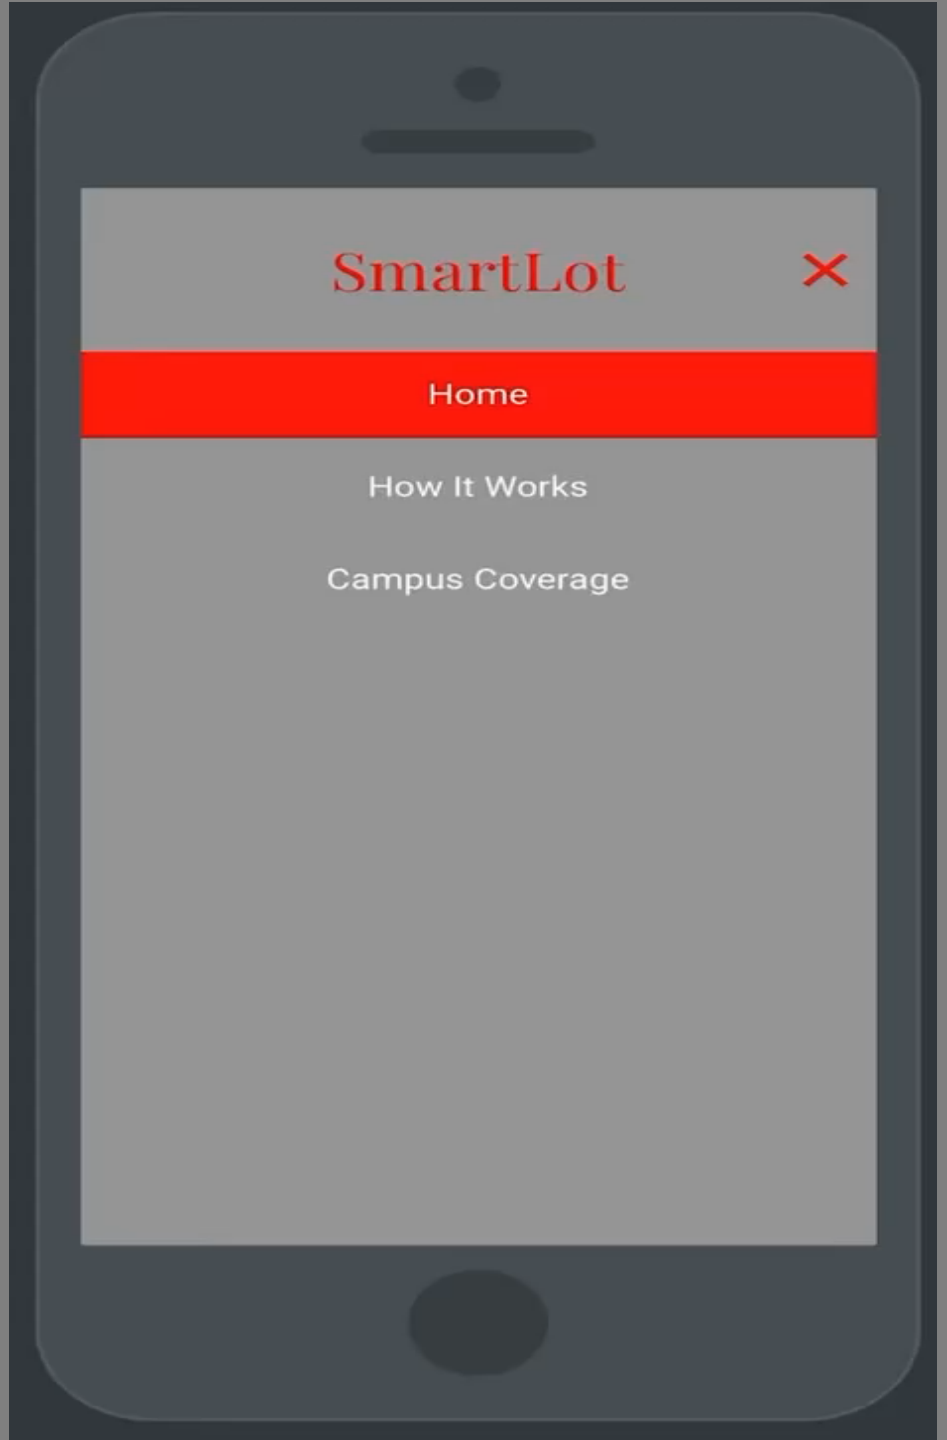
Key Features

- 📍 Live campus parking map
- 🚙 Real-time spot availability
- 🧭 Navigation to open spaces
- 🔔 Notifications for open spots
- 📱 Easy-to-use mobile interface
- Parking lots checked by students and Winston Salem State Parking and Transportation

Benefits of Smart Lot

- ⏱️ Saves time
- 😌 Reduces stress
- 📈 Improves campus traffic flow
- 🎓 Helps students arrive on time
- 🌱 Reduces fuel waste and emissions





Web design

A website that helps students quickly find open parking spots on campus, reducing the time and frustration that comes with driving around looking for parking. It makes the parking process faster, easier, and more convenient so students can get where they need to be on time.

Future plans

Our future plans are to develop the app into a fully working platform that provides real-time parking updates, directions to open spots, and smarter parking tools for students. We also hope to expand its features and bring the system to more college campuses in the future.
