What is Smart Lot?

SmartLot is a smart parking system designed to help students quickly find available parking spaces on campus in real time.

🚙 **Real-Time Parking Updates**

📍 **Live Map Navigation**

⏱️ **Saves Time**

📱 **Mobile-Friendly App**

🎓 **Student-Focused Solution**

Why do we need Smart Lot?

Parking on campus is frustrating → Students waste time driving lot to lot → Limited visibility of available spaces → Causes stress and lateness to class → Traffic congestion increases during peak hours → 👉 “Finding parking shouldn’t be harder than the class itself.”

How does Smart Lot work?

- Sensors or cameras detect open parking spaces
- Data is updated in real-time
- System sends information to the app
- Students view availability and navigate to a spot

Key Features

- 📍 Live campus parking map
- 🚙 Real-time spot availability
- 🧭 Navigation to open spaces
- 🔔 Notifications for open spots
- 📱 Easy-to-use mobile interface

Benefits of Smart Lot

- ⏱️ Saves time
- 😌 Reduces stress
- 📈 Improves campus traffic flow
- 🎓 Helps students arrive on time
- 🌱 Reduces fuel waste and emissions
